

AMERICAN SPEEDWAY/Ship Of Fools (Prophase Music) This is some awesome metal with lots of hooks that got my head moving. This is like southern boogie meets metal and just the riffs and guitar sound won me over in no time. The singer has a killer voice and he fits the music oh so well. The production is not over polished and it gives the band that garage like feel, that for them and their sound, works rather well. Band remind me of the much missed Circus of Power, but they just plain rock and these tunes put up against new rock band and this band would whip their candy asses. Info:
