

NEO/Broadcast DVD (MVD) This was some awesome progressive metal. The production is crystal clear and the camera work makes you feel you are in the front row. The songs flow right through your veins and the singing and playing are top notch. The songs took me on a rollercoaster ride that I didn't want to get off. If your sick of all the clone progressive power metal bands and all the bands trying to sound like Dream Theater, buy this and you won't be disappointed I assure you.
