SOLITUDE AETURNUS/Hour Of Despair (Metal Mind Productions) This is a live CD that already came out on DVD. There is 12 tunes on this and as far as live quality goes, this was excellent. The band sound tight on this as they bang out their doom metal. Singer sounds great on the pipes and if you already have this on DVD, well then get the CD to crank up in your car. This is some bone crushing doom and is one the heaviest bands around. Info:
