Rating: 6 stars!

Ok, I'll be totally honest with you..I saw an interview Blaze did not too long ago & he admitted that he uses some sorta hair products that help balding men re-grow their hair, & when I started watching this dvd, I couldn't stop looking at his hair..it's so full & thick now..I remember seeing him with Iron Maiden many years ago when they did a club tour here in the USA & Blaze would sweat, & you could literally see right through his hair & it was like 6 pieces of hair on a bald scalp...now he has this thick main of hair & it's like a totally different guy! Ok, I got that out of my system, so the new DVD that the man & his band put out is quite simply pure metal genius...his band is strong, his guitar players are tight, his drummer is strong, & Blaze...god, his voice is amazing, but watch the dvd & look at the funny faces he makes..he's funny to watch! Ok, I will stop with the things I noticed & stick to the fact now...the band is amazing, it's pure metal, & the highlight for me is the band covering Iron Maiden's "Man On The Edge", which is the first single released off the Blaze era of Maiden & it sounds stellar! Watching Blaze interact with the crowd, sweating on them, high fiving, & making contact, it makes you feel like you're there, & the video of the band is superb & sharp & super clear! There's a load of bonus features as well & the interviews can kinda drag on a bit, but they are still interesting & this is a killer dvd for the real metal fans!
