SOCIETY 1/Fearing The Exit DVD (MVD) I remember hearing this bands music about a yr ago or so and what I have here is a 2 disc set of some live shows and videos from this band. The 1st show is from a show in 2004 and the band do put on a show and the music is more angry and vicious live than what I remember on disc. The band play a sort of industrial meets newer metal sort of sound and while I am not a big fan of that style, this is some really good stuff for the style they are playing. The tunes are heavy and don't lack power and the band can crank out some pretty killer riffs and live they are better than on record. There is also a 2nd show from FL, some videos, a documentary on the band, interviews, lyrics and about anything else they could cram and fit on 2 discs. If your a fan of the band this is easily a must have and when bands put out DVDs, they could take a lesson from this band cause they really show you how do to it the right way.
