It's interesting..The Wake has been around for several years, yet I can't remember every hearing them...it's really sad that the band never got any sorta exposure here in the USA..their sound is like a modern Bauhaus & they are definitely very cool if you're into gothy sounding rock. This dvd is unique because you get 2 discs..one is audio & the other is the dvd video part..the videos are, in all honesty, kinda grainy, & not exactly what I would consider pro-shot, amazing, quality wise, I mean they are definitely well filmed, just it's got an amateur look to it, which is probably what the band wanted anyways! I am 100% sure that all the goth lovers will flip out when they check out this dvd/audio package..it's really good stuff, kinda creepy & depressing in certain parts, & totally worth checking out!
