Here in North America we don't have very many metal festivals. In Europe, they have tons of them that go from Spring to Fall. One of bigger ones in Eastern Europe is the Metalmind Festival in Poland. This year's festival just took place (Megadeth headlined), and last year's DVD is now being released in the U.S.

Metalmania 2007 DVD
Metal Mind Productions

Metalmania 2007 is jam packed with 30 songs from artists including Korpiklaani, Vital Remains, Entombed, Destruction, Sepultura, Paradise Lost and Testament. The audio and video quality are excellent. It was shot with a bunch of cameras, so there's no shortage of different angles and perspectives. The editing is also good, showing everything without making the viewer dizzy with 87 edits per second.

In addition to the DVD of main stage bands, there's a bonus CD with songs from bands on the second stage. Some of those artists include Tyr, Horrorscope and Deivos. If you couldn't make it to the festival in person, the *Metalmania 2007* DVD/CD is the next best thing. There's not much bonus material, but with almost four hours of music, there's plenty of bang for your buck.

(released April 15, 2008 on Metal Mind Productions)
