THE DAMAGE MANUAL

Walker Connelly Wobble Atkins
(MVD DVD)

by *Chris Forbes*

I had never heard of this band or project before. The band play industrial metal with a bit of a techno edge to it. It hits hard, very hard. Sort of like Godflesh and Ministry. The really cool thing about this DVD is they show you the making of one of the bands albums. Really cool footage that shows people how music is made and how a release comes together. Trust me there is a lot of work involved and this shows you visually just how a record gets done. You also get some live footage from the band as well. This was a way cool release and even though I am not a huge fan of the band, some of the stuff I did like and the making of the record footage is awesome. Info: <http://www.mvdvisual.com>
