The Meatmen - "The Devil's In The Details Vol 1" (DVD)

The Meatmen – “The Devil's In The Details Volume 1” (DVD) I've probably been waiting for this DVD since 1986, when my friend in Jr. High, Andy Mulligan (still the punkest person I have met to this day) wore his “We're the Meatmen and you suck” t-shirt to school in 8th grade. When I saw that shirt with the cartoon Tesco Vee spitting out pissed off lyrics and the mob of fans throwing shit at them, I had to know what they could spew into my juvenile delinquent, yet still developing mind. Once I heard the rebellious punk rock poetry that Tesco Vee preached in raw and explosive manner I was hooked and always will be a huge Meatmen fan. I have so many fond memories that involve Meatmen songs as a sound track to those moments; The Gaff, City Gardens, The Cabin.... wow the human mind is incredible. Now fast forward 22 years, many things about me have changes. I'm married, I have kids, I'm not so angry at the world, but one thing that hasn't changed is my love

for

For those unaware, The Meatmen had one of the nastiest, most offensive senses of humor in all of punk rock — and that's saying something for a genre of music that is known for it's wildness. Politically incorrect before the term existed, frontman Tesco Vee — the one constant in the band's lineup — kept things as cheerfully dim-witted and tasteless as possible, cracking graphic jokes about various sexual functions while baiting everone and anyone regardless of there background or short comings including but not limited to; handicapped children, The French, Hillbillies, Pervs, etc.... The Meatmen's music was by and large, standard-issue hardcore punk, with nods to heavy metal in their latter years; much more important, however, was their utter outrageousness & obnoxiousness, which was the real foundation for their cult like following.

This DVD is filled with tons of raw footage from shows, behind the scenes interviews, random Tesco Vee nonsense and or course an ass full of great Meatmen songs. Of course The Meatmen aren't for everyone, their humor pisses of many, but for those who don't care about political correctness, mocking the religious cults of society, and of course a lot of cock & pussy talk, then you will enjoy this DVD in all of its entirety. The sound track alone is reason enough to buy this DVD, but the video itself is a 3 hour sexcapade of many nostalgic & hilarious moments. There are outtakes of video interviews with Satan, live clips from shows all over the world, unauthorized interview clips with ABBA, and of course many references to the enormous size of Tesco Vee's love muscle. Personally, they were many highlights to me in the video including the Centurions of Rome video, the tour of Tesco's studio, and the live clip from a Meatmen show I attended in 1989 at one of the best, but less talked about punk venues, City Garden, NJ (Which in the video is mistakenly labeled as City Garden, DC) So Weenbags of anal desire, loosen up your sphincters and get ready for a 3 hour bucking bronco ride or song, Satan and sodomy. This DVD is going rock you so hard you will relinquish all of your lovely coconut oil all over your TV screen.

The only DVD officially endorsed by Satan.
