D.O.A

The Men of Action DVD

Track Listing:

Rating: 6 stars!

I got turned onto D.O.A. quite a few years ago...honestly, it was way after the bands hey day, they were in their prime many, many years ago, but I still got a taste for what the band was all about & now there's a new dvd that chronicle's the bands past, present & future! Canadian punker's D.O.A. have influenced ALOT o' bands over the years....Green Day, Nirvana, Sonic Youth, The Offspring, etc., & in their 30 year time span, they NEVER sold out, never really changed, & this dvd proves that...there's 16 live clips & 10 music videos & there's 2 ways to watch the dvd...there's a commentary part with Joe Keithley telling the story of D.O.A. & other assorted punk tales, or, you can watch the dvd as a whole with no commentary...I actually preferred it without the commentary! As a bonus, there's a limited edition version of this dvd that includes a copy of the bands new studio cd which rocks! What can I say, D.O.A. are a kick ass punk band, they have a long history & this dvd covers it ALL! In all honesty, it's kinda sad to look at this dvd because it's almost like a grand finale to the bands career, I mean, after 30 years, like Joe Perry from Aerosmith once said about Aerosmith at this point, "they are closer to the end than the beginning", what I mean is, when you watch this dvd you kinda get sad when you realize all that they've accomplished & that the guys are still around, BUT, not like they once were & as a living testament to what D.O.A is all about, this dvd does a damn good job at that!
