The Devil Went Home & Puked: Robert Pollard's Rock Show (MVD Visual)
By: Paul Autry

If you ask me...the main program here is kinda like an hour long YouTube video. It's a collection of snippets that seem to be thrown together without any real reason. It doesn't make a lot of sense. Although I'm sure it would be fun to watch if you were high. Since that's not something that I do...let's skip to the better reason to purchase a copy of this release. Yes...there is a better reason than the main program. This is probably the only DVD that I'll ever say this about...but...the main reason for adding this release to your collection are the special features. That's right...the special features. It's a collection of nine, hard to find full length videos from Guided By Voices and some of Robert Pollard's other projects, including Circle Saw Boys Club, Winston's Atomic Bird, I-Razors, Get Me Extra and more. That's about all I can really say about this one.
