Graffiti: art or vandalism? That question has been debated for decades, especially in cities where taggers have turned entire transit systems into a) mobile galleries, or b) rolling eyesores, depending on your point of view. Made in 1982, this provocative documentary may have been the first serious attempt to fairly present both sides of the debate. It introduces the most prominent taggers of the day and argues that graffiti, breakdancing and hip-hop music all were a slice of the same Big Apple pie. A second disc updates viewers on the fates of the B-boys, offers a photo gallery of their work, and adds previously trimmed material.
