JOHN MAYALL'S BLUESBREAKERS

Live At Iowa State University

(MVD Visual)

by *Chris Forbes*

This was filmed way back in 1987 in some small smoke filled bar it looks like. I like some blues music and this was very good due to the fact it wasn't just a bunch of jamming and there was some singing and the songs had some melodies and the like. The camera work isn't bad and the band sound tight and play the songs quite well. The singer has a sort of gruff voice, but fits the style of music the band is playing. The guitar work is fantastic and the sound is pretty good as well. A good solid release of blues rock that would please any fan of the genre. Info: <http://www.mvdb2b.com>
