Out Da Box TV – Immortal Technique

Posted on [April 13, 2012](#) by [admin](#)

Out Da Box TV presents a special new interview with **Harlem's** intelligently outspoken and passionate Emcee "**Immortal Technique**". We caught up with Tech, recently at a show here in NY, where he was gracious enough to provide us with a very insightful interview. **Tech** took the time to speak on a set of topics including his recent humbling experience visiting **Haiti** and seeing the conditions of the people. He also shared solutions that people of the U.S. could use to strengthen themselves in this currently struggling economy, and gave some advice on helping to strengthen the minds of our youth as well. He concluded the interview with some worthy details on his anticipated, upcoming album "**The Middle Passage**", which hopefully will be released before the end of the year. It was indeed a great pleasure buildin' with one of the most honest and politically aware artists in music today. Please take the time to watch this truly insightful interview. We hope you'll be inspired!
