Ex member of **Procol Harem**, **Trower's** music has flirted with Prog on many occasions.

On *Living Out Of Time: Live* we get a very recent concert in front of an enthusiastic German crowd. The performances are great, the mood is warm and generous, all the tracks are good and the concert is very well filmed and taped.

Just a great DVD letting you catch live at it best one of the great guitar player/composer out there. Highly recommended.
