Joy Division *Under Review* in Documentary DVD

Even 26 years after Ian Curtis' death, the eulogizing continues for Joy Division, who are the subjects of their very own [MVD Visual](#) *Under Review* DVD. Sexy Intellectual will release *Joy Division: Under Review* on the appropriately gloomy October 31.

This straight-to-DVD release, which bears no relation to the [previously reported, Anton Corbijn](#)-directed [Control](#), covers the band's short career in seventy minutes. According to a press release, it includes "rare musical performances, obscure footage of rare interviews, and rarely seen photographs." Rare!

The documentary also includes interviews with Ian Curtis biographer Mick Middles, former *NME* and *Melody Maker* writer Barney Hoskyns, former *Mojo* editor Pat Gilbert, Manchester musician John Robb, and author David Stubbs, among others. Bonus features include a "transcribed Ian Curtis audio interview, 'The Hardest Joy Division Quiz in the World Ever', contributor biographies, and [a] 'Beyond DVD' section," which we can only hope means cookies. Now that would be a bonus feature!

Les Georges Leningrad Prep New Album, Tour

Also prep surrealistic tour wardrobe

Ta-Dada! Montreal-based art- (anti-art?) punk trio [Les Georges Leningrad](#) is poised to release another ["petrochemical"](#) album. Titled *Sangue Puro* (Italian for "pure-blooded"), the new full-length will appear in the U.S. on October 3 on [Tomlab/Dare to Care Records](#).

On their [MySpace](#) page, the band describes this, their third full-length, as "a mix between Baltimore hip-hop, ludicrous musique concrète and Bakou's industrial hardcore."

Following the release of *Sangue Puro*, Poney P, Mingo, and BoBo will bring their infamous live show to North America, touring this November with fellow Quebecois [Duchess Says](#). [\[MORE...\]](#)
