Nirvana - "A Classic Album Under Review: In Utero" DVD - A brief but well-done look at this 90s rock act's final studio LP, from the vantage point of several underground music journalists as well as some ex-studio cohorts of the band. It's a well-done documentary, featuring some cool photos and insights from folks like Cobain's first girlfriend, Nirvana's original drummer Chad Channing, 'Bleach' producer Jack Endino, and others. And the looks into producer Steve Albini's work and references to Nirvana's inspirations (Pixies, Butthole Surfers, etc.) are spot-on and worthwhile. Very enjoyable and with little mention of that scourge of Nirvana-fans, the former Mrs. Cobain. Hurrah. Liked it. (MVD Visual)
