

THE BYRDS
Under Review DVD
(MVD Visual)
by Chris Forbes

This is by far the most detailed under review I have ever seen. This is a double disc and clocks in at over 3 hours. The Byrds were a 60's rock/folk group that had some hits like "Mr Tambourine Man" and "Eight Miles High". I liked some of the stuff this band put out and watching the story of how the band came together was quite fascinating and like I said this goes into great detail and stuff, which made it cool to watch. You also get some live stuff and if your a fan of the band, this is A MUST GET. I mean cmon at 3 hours you get the whole history of the band and then some and while I am not a huge fan of the band, after watching this I got a new found respect for the band and they did write some really good songs for their era.
