KRAFTWERK AND THE ELECTRONIC REVOLUTION

A Documentary Film

(MVD Visual)

by *Chris Forbes*

I am no fan of this whatsoever, but I watched this with an open mind. Now I still don't like the band and I admit I didn't watch the entire thing as it clocks in at 3 hours, but from the parts I did see, and I did watch more than a few minutes, this is easily one of the most extensive DVD's I have seen since I watched them Violence DVD a few years back. This goes through the history of the band and the roots of their style of music. There is interviews with ex band members and you get lots of footage to boot. Let put it this way, if your a fan of the band, this is something you can't live without. It was put together magnificently. Info: <http://www.mvdb2b.com>
