SUSPYRE/When Time Fades (Sensory) Pretty cool progressive power metal in the vein of Dream Theater. The band play some long tunes with a progressive feel and also throw in some power metal and even thrash here and there. The singer has a strong, clear voice that I enjoyed and the tunes were full of wicked riffs and just heavy overtones. The production is nicely balance and you can hear everything quite clearly. The riffs will not go over your head and while it is progressive and the tunes are long, trust me you will not be bored. Info:
