***Bob Dylan - "1966 World Tour - The Home Movies" DVD*** - Filmed by Dylan's then-drummer, Mickey Jones, during their controversial electric tour with The Band, this lengthy and comprehensive document provides valuable insight into a major turning point in rock history. The charismatic and articulate narration by Jones himself is entertaining and the old 8mm footage from way back when is clean and interesting. Extended recollections by other peripheral musicians also pepper this unofficial retrospective, which at 95 minutes is a must-see for serious Dylanophiles. (MVD Visual)
