What they say: Where the Dead Go To Die is about a group of children living on the same block in a small town who are brought on a journey through different dimensions and time periods. On the night of the film, Tommy, one of the children, is about to have a devil fetus living inside him.

Tommy attempts to help Ralph court the girl across the street, who is an unwilling participant in a tape trading ring. Add in a memory stealing junkie living inside an abandoned car, and you have pure mind melting insanity!

What I say: When I fired this up I was appalled. The animation is a jerky mess, it feels so cheap...but I couldn't stop watching it! Despite all these flaws this is one of the best I have seen in quite some time. The fact that it works despite being a total train wreck is a miracle.

Every frame of this film oozes fear, despair and pure evil. I have not seen such a disturbing film. The fact that it's animated only adds to the weirdness. Such things go on to happen, and they are doing them, and maybe that's the point.

The above description really does the film no justice as it's even more fucked up surface of the depravity on display. This film still haunts me and I put off writing as I absorbed what I saw. Picture quality is irreverent, this movie will damage your praise. If you have any interest in the dark side of film you MUST check this out

Film: 9/10
