Kill The Record Labels

MVD Visual, 65 minutes, \$19.95

Documentary feature on rap/hip-hop's struggle between the guys making the music and the record companies/RIAA. Seems that the Big Business side doesn't like the rappers making money without them getting their cut and are resorting to strong-arm tactics to shut them down. I thought this was a satire until I watched the preview at www.killtherecordlabels.com. Didn't anyone ever show these guys Courtney Love's famous [Salon.com essay](#) on this subject?
