The perfect CD to put in your boom box and hang on the porch to relax throughout the day.

Indie, folk, jazzy, rock... a wonderful blend of sounds.

Snakes and Music have a dynamic sound with tight sounds, rhythm that pulls you in. Their music seems to have a slight country influence, but not enough to turn away anyone with a distaste for that genre of music.

This CD has a perfect meshing of rock in all of its forms. I suggest learning more about this band on your own and hearing them for yourself... it's the only way to really get it!
