## Snakes & Music

*Isabelle*

I know some manly-men that are terrified of snakes. Snakes are scary and in this case, the music is made to not make one, "scared." With the two items combined: Snakes & Music make for happy road-trip music in the desert, jungle or the south. This music is pure, soulful, and organic. The down-home bluesy tidbits of classic instruments, (banjo and harmonica), on tracks "Please Explain" and "Hope Texas treats you Like a Queen" were enough to inspire me to build a campfire to snuggle with. Nice songs to sleep

under the star with. They might even protect you from snakes in the dark!
