

WIC/Die For Us DVD (MVD Visual) This is a DVD of another one of those modern groove hardcore metal bands. The band are good at what they do, though it is not something I am into. They sound tight and they play the tunes well and the crowd eats it every note up. There is a full concert and some bonus songs from a show in Phila, PA and an interview. They are one of the better sounding bands doing this style I will say. Info:
