Win a copy of "The Space Movie" DVD courtesy of MVD Visual. Made in 1979 to celebrate the 10th Anniversary of the moon landing. This DVD will be available in-stores on Tuesday, August 28th. NASA and The United States National Archive made all the footage available for the very first time , including unseen film of the lunar landscape, life on the spacecraft, Mars, Venus and beyond. Also included are the conversations between the astronauts and ground control in Houston. The films soundtrack was written, arranged and performed by Mike Oldfield. He used extracts from his ground-breaking symphonic tone-poems such as Tubular Bells and Hergest Ridge and wound these in and out of the NASA soundtracks together with new music. The result is a unique soundtrack for a unique film.
