Remembering Knebworth 1978 (MVD/Voiceprint DVD)

Picture: C Sound: C
Extras: C+ Main
Program: C

A documentary and not a concert film,

Remembering Knebworth 1978 could have shows us the many music acts appearing like DEVO, Jefferson Airplane, Atlanta Rhythm Section or even Tom Petty, but all we get are the very lame Genesis trying to survive the departure of Peter Gabriel and it is a shame because this could have been so much more than you get on his disc.

A reproduction of the original program is much more interesting and an interview with promoter Freddie Banister, but that is all. Both the main program (filmed in 16mm) and interview (taped in PAL analog video) are soft 1.33 X 1 presentations and the Dolby Digital 2.0 sound is more mono than stereo. Buy this one at your own risk.
