## DAN DEAGH WEALCAN - Fragmented Consciousness

*"Fragmented Consciousness" - the third full-length album by Russian-Ukrainian experimental duet DAN DEAGH WEALCAN.*

The third full-length album by international band.

The third page in the history of Russian-Ukrainian experimental duet Dan Deagh Wealcan it's abig journey in search of total stylistic madness. More eclectic and more distinctive album is also a conceptual work about the subjective specifics of fragmented consciousness. It's an attempt of analyzing the various processes that occur in our mind and their influence on our view of reality. It's a way to gather the pieces of thoughts into one and try to accept yourself for who you really are.

Sixteen musical "fragments" were recorded throughout the year 2015 and together are the inevitable creative evolution of the duet, maintaining the distinctive style of the previous two albums and bringing new overtones along as well.

The stylistic classification of the band is getting harder and harder with every released album. It is a bizarre melting pot of Industrial, Post-Hardcore, Progressive, Alternative-Metal, Art-Rock, Electronic, Noise, Symphonic-Rock, New-Prog, Mathcore.

The album was mastered once again by Anton Vorozhtsov at TA Productions, located in Zaporizhzhya, Ukraine.
