These great survivors of alternative music celebrate their 25th anniversary this year with the release of their 6th album 'The Cure' which went straight into the top ten. Heavy promotion has surrounded its release including an exclusive live performance on MTV's 'Live Night Saturday' and headlining at the 'Curiosa Festival' organised by Robert Smith himself, for which a series of dates across North America alongside two of today's biggest artists Muse and Interpol are underway. This documentary traces the band's turbulent history and brings the story up to date with their more recent role as the elder statesmen of misery and the inspiration for a whole new generation of bands.

For the first time 'The Cure: Out Of The Woods' goes behind the scenes and under the greasepaint to discover the truth about this astonishing band. Revealing how these performers of melancholy music achieved their success, how they've continued to be at the cutting edge of innovative music for more than 25 years, and why they remain hugely relevant in today's fickle music industry.
