## PAIN RELIEF at the Speed of Sound

**A breakthrough audio program that uses healing music, subliminal affirmations and brainwave entrainment to support chronic pain relief without drugs.**

Over 40 years ago, Steven Halpern pioneered the field of New Age healing music that has helped millions relax and experience a greater sense of well-being and inner peace.

This new release takes his work to the next level by incorporating the latest discoveries in brain science, epigenetics, and audio technology.

Halpern's music has received international acclaim for its proven ability to reduce stress and relax the body. Now, he adds additional elements that make this album a must-have for the millions who deal with chronic pain and are seeking a natural, non-drug alternative.

*Pain Relief at the Speed of Sound* helps orchestrate your genes and subconscious mind to support well-being, as recommended in the best-seller *Super Genes* by Dr. Deepak Chopra and Dr. Rudolph Tanzi.

One doesn't audibly hear the affirmations or entrainment, but our innate intelligence does — and responds automatically.

This album is especially recommended for Baby Boomers who are experience more aches as pains as they age.

Note: this CD is not a substitute for medical care. Please consult your primary health care provider.
