who cares what music is playing in my headphones?

DAN DEAGH WEALCAN

Who Cares What Music is Playing in my Headphones?

The second full-length album by the international duo from Russia and Ukraine.

"Who Cares What Music Is Playing In My Headphones?" differs dramatically from the first album of Dan Deagh Wealcan, regarding both composing and overall sound. Nine completely different tracks, recorded throughout 2014 that do not bear any common concept, which is, in a way, a conception itself. This is a "playlist from the author", arranged at free will, an attempt to embrace different styles and genres. After all, the music that's in your headphones is important only for you...

More calm and philosophical, but still complex work is major steps forward for the duo, combinind such genres as: Industrial, Progressive, Post-Rock, Hardcore and Electonic. As before all instrumental parts were recorded in Moscow, and vocals were recorded in Zaporizhzhya. The album was mastered at TA Production, Zaporizhzhya, Ukraine.

Recommended for fans of: Porcupine Tree, Ministry, Nine Inch Nails, Tool, Mike Patton and Devin Townsend!
