

## DESERT NEAR THE END - Theater Of War

"Theater Of War" - the third full-length album by Greek Brutal Power/Thrash Metal band DESERT NEAR THE END.

The third full-length album by Greek Brutal Power/Thrash Metal band.

The album features band's most extreme approach musically and acts as a bridge between their mid 90's Power/Thrash Metal influences and the most Extreme elements of today's Metal.

The unique nature of this album is that it doesn't fit in any genre exclusively, it stands on many worlds and doesn't serve under one banner. It combines epic and dramatic musical structures with ultra fast drumming and aggressive vocals in order to bring the story behind the lyrics to life.

Because "Theater Of War" is a concept album, it is the final chapter of the trilogy the band began to unfold with their debut album. It's a story about absolutes and how they enslave people with their blinding light. The story of "a chosen one" who chooses to be an example and not a messiah, to become a "mortal sun" whose light guides and not only blinds.
